Summary

Hello there!

I'm Hafiz Umer Farooq, a passionate Full Stack Developer with expertise in both MEAN (MongoDB, Express.js, Angular, Node.js) and MERN (MongoDB, Express.js, React, Node.js) stacks. I thrive on turning ideas into scalable, user-friendly applications and believe in the power of clean code and innovative solutions.

What I Bring to the Table:

• Strong command of front-end technologies, bringing designs to life with responsive and dynamic user interfaces using Angular and React.
• Proficient in server-side scripting with Node.js and Express.js, creating robust and efficient back-end systems.
• Experience with MongoDB for seamless data storage and retrieval in NoSQL databases.
• Knowledge of the latest trends in web development, staying up-to-date with emerging technologies.
• Code management using Git, Gitlab, Bitbucket and TFS
• Agile project management using JIRA, Trello and Asana

My Journey: ♀#

With a background in Master degree, I've had the opportunity to work on diverse projects, honing my skills in full-stack development. I thrive in collaborative environments, leveraging my problem-solving skills to create meaningful and impactful applications.

Let's Connect:

I'm always open to discussing new opportunities, collaborations, or just geeking out about the latest in tech. Feel free to connect with me or explore my portfolio at Portfolio Link, where you can get a glimpse of my projects and coding adventures.
